# Exclusive: College Student Injured by Moderna Vaccine Says Independence Now Just a 'Distant Memory'

*At age 21, Philadelphia native Andre Cherry had an active life and a promising future, as he worked toward completing his bachelor's degree in English. But in an interview with The Defender, Cherry said all that ended after his second Moderna COVID-19 vaccine.*

By Michael Nevradakis, Ph.D.

At age 21, Philadelphia native Andre Cherry had an active life and a promising future, as he worked toward completing his bachelor's degree in English.

Cherry's studies ground to a halt, however, shortly after his second dose of the Moderna COVID-19 vaccine. Within hours, Cherry experienced an adverse reaction that was moderate at first but grew more intense.

To this day, Cherry experiences the random, daily onset of tremors, muscle spasms, involuntary vocalizations and temporary paralysis.

Cherry, now 23, shared his experience with The Defender. He provided extensive medical documentation to support his story.

**'Only time I don't have symptoms is when I'm asleep'**

Cherry received the two-dose Moderna series on May 26, 2021, and June 23, 2021. After the second dose, he developed a "moderate tremor in my left arm, where I was injected both times," he said.

But what started as a moderate tremor quickly spiraled into a range of severe adverse reactions, which continue to afflict Cherry to the present day.

Cherry told The Defender:

> "I experience tremors in all of my limbs. Dystonia of my face, neck, torso, diaphragm and extremities. Muscle spasms throughout my body. Violent involuntary movements such as punching, kicking, jumping, walking and running — known as ballismus [hemiballismus]. Involuntary speech, laughter and screaming. And flaccid paralysis of my neck, torso and extremities.
>
> "All of these symptoms are intermittent and random, varying in duration, combination and intensity on a daily basis."

The episodes can last anywhere between a couple of seconds to hours on end, Cherry said. In one instance, he experienced a symptomatic episode of "over 16 hours of full-body flaccid paralysis, combined with several instances of ballismus, vocalizations and muscle spasms."

Cherry said the episodes can occur randomly or be triggered by exertion, repetitive movement or when his body comes in contact with pressure, heat or cold.

"Trying to resist my involuntary movements or attempts made by myself or others to force my body to move the way I want it to when it's in a dysregulated state also exacerbates my condition," Cherry added. "All I can do is wait for the symptoms to run their course."

"The only time I don't have any symptoms is when I'm asleep."

**'My family has had to spoon-feed me, bathe me and clothe me'**

Cherry's symptoms are disruptive to his daily life "to the point of debilitation," he said, and have interrupted his studies.

"I got vaccinated in the summer of 2021, and haven't been able to return to college since," Cherry said. "My independence is a distant memory. I can't rely on my body to consistently attend classes, in person or online, or complete work tasks."

He said he struggles to perform mundane day-to-day tasks.

"I can't do housework because exertion and repetitive movements trigger my episodes," he said. "I can't travel by myself. I can barely travel at all," he said. "When I do, it's a process that can involve practically the entire family. There have been times when my family has had to spoon-feed me, bathe me and clothe me."

His symptoms have greatly limited his freedom and mobility. He told The Defender:

> "My ambulation has been extremely limited. Because of my episodes of flaccid paralysis, I've fallen many times. Because of these falls, I'm confined to the first floor of the house and sleep in a hospital bed that we bought with guardrails on the sides to ensure that my spasms and thrashings don't throw me to the floor.
>
> "My family has procured a variety of safety equipment, including wheelchairs, a hoyer lift, collars to stabilize my neck when it goes flaccid, a body harness to keep me from doubling over when I'm in my wheelchair, several gym mats and large pillows to mitigate the damage of impacts against the floor or other surfaces and ramps for the porch to ensure that I don't injure myself or others."

**Doctors 'refuse to investigate any connection to COVID mRNA shots'**

Cherry has visited a wide range of doctors, at hospitals all across the U.S., he said. But for over a year, he had difficulty finding a doctor who would draw a connection between his condition and his vaccination.

He said:

> "I've seen several doctors, including neurologists, movement specialists, physical and occupational therapists, a rheumatologist, a hematologist and a neuropsychologist.
>
> "I've been to some of the best hospitals in Philadelphia and have even been seen at the Mayo Clinic in Jacksonville, Florida, Columbia University Hospital in New York, and the NIH [National Institutes of Health]."

The doctors he saw refused to diagnose his condition as a vaccine injury.

"Throughout the 21 months it's taken me to get a diagnosis and care, the prevailing narrative among many of the doctors I've seen is that I'm suffering from functional neurologic disorder, which allegedly was brought about by stress and anxiety," Cherry said.

"This assertion that my symptoms were precipitated by stress, anxiety or other psychological factors, I've found, is a common problem among the vaccine-injured community, whose doctors, for the most part, refuse to investigate any connection between their patients' maladies to the COVID mRNA shots," he added.

The Defender has previously interviewed several other COVID-19 vaccine injury victims who were also told that their health difficulties were a result of "anxiety."

Cherry said some of the doctors lied about their interactions with him and some diagnosed him with a psychological disorder — without his knowledge:

> "One of the first movement specialists I saw claimed the vaccine doesn't remain in one's system for more than two weeks.
>
> "Three of the doctors I've seen have even gone so far as to lie in their visit summaries about their conversations with me or about my mental state, including my primary care physician in 2021, who diagnosed me with psychological conversion disorder without my knowledge."

Six months after his injury, Cherry took a neuropsychological exam to see how much — if at all — he was being affected by stress and anxiety. The results found only mild anxiety.

He also sought a psychological evaluation. "The doctor said that whatever stress I experience is commensurate with my horrid situation, and that he could find no evidence of any causative anxiety," Cherry said.

As recently as late 2022, doctors he visited were still "claiming that my movement issues were precipitated psychologically," he said.

Aside from visiting several doctors in an attempt to locate one that would be understanding of his situation, Cherry also rotated through numerous medications and treatments.

He told The Defender:

> "I have tried a veritable smorgasbord of medications and supplements. At first, I was able to find a homeopathic practitioner who gave me a veritable handful of supplements to take. They were meant to detox my system to promote my body's capacity for healing.
>
> "If I recall correctly, in terms of volume, I was ingesting more than 30 tablets of supplements daily, not to mention the various salts and oils included in the treatment.
>
> "I also went through at least six months of physical therapy. However, almost every session ended in a massive episode that would require my physical therapist and brother to carry me into the car. Although my physical therapist tried as much as he could to help me, it only worsened my symptoms."

Doctors never reported his condition to the Vaccine Adverse Event Reporting System (VAERS), even though he asked — so Cherry submitted his own report.

**Supportive doctor 'a breath of fresh air'**

After a long search, Cherry finally found a supportive doctor — one who has treated other people in a similar situation to his.

Cherry told The Defender:

> "Currently, I'm in the care of Dr. Pierre Kory, who has been taking care of several of the vaccine-injured with candor, compassion, and a real diligence in his approach to finding the best ways to treat his patients — a real breath of fresh air after all this time.
>
> "He has diagnosed me with 'severe post-vaccination injury syndrome,' consisting largely of neurologic motor dysfunction. He also informed me that I'm one of his most difficult patients to treat."

Cherry also began a new course of treatment with the help of a support group for vaccine-injured individuals. And he said he's also found support from family, friends and his faith community.

"It has been a great blessing to me, especially since I know that there are so many people who have been vaccine-injured who unfortunately do not have that same kind of support from their own families," he said.

Describing his experience being a part of Catherine "Cat" Parker's COVID-19 Vaccine Adverse Reactions Support Group on Facebook, Cherry said, "The opportunity to connect with others who are vaccine-injured means a lot to me."

"It helps me remember that I'm not alone and keeps me motivated to do what I can to help spread awareness about the mRNA shots and their many victims."

Cherry also shared his experience with the wider public, producing videos posted on YouTube and Instagram.

When my daughter's BPM soared to 168 and she was convulsing the intern said it was anxiety. It was Lyme Disease. Now disabled. Their is talk that vaccine hesitant people have a mental disorder and should be on medication for their delusions. CDC just developed a code for the hypothesis! You see where we are going with this.

**Ricky Ricardo** → MultiChubby1
15 days ago
I'm enjoying my delusion! I'm waiting patiently for the end of this movie. For the record, I am not "vaccine hesitant"...I'm simply healthy and refuse to have any toxic substance injected into my body. It's actually a stupid argument, because the mRNA Gene Editing shots are not vaccines. Wouldn't that make the ones pushing this - delusional!?

*Brook Jackson's case dismissed by Judge Truncale.* Appeal?
"Judge sides with Pfizer's lawyers and DOJ, as expected"

Brook Jackson's case under False Claims Act was dismissed yesterday, March 31 by Judge Truncale. This is very disappointing but not unexpected. I am not a law expert, and will defer to others to provide a more thorough analysis. It is my understanding from Brook and from her attorney Warner Mendenhall that they are planning to appeal.

The dismissal document is over 100 pages. I am briefly commenting only on a few things here.

We're in for the fight of our lives because all us unjabbed, healthy people have to eat and these monsters have started putting the mRNA into our food supply, as stated by the Defender Thomas Renz.
6 0 Reply • Share ›

**Ricky Ricardo** → Judy M Burgio
11 days ago
Yes; we are healthy, going about our lives as we always have (mostly) and yet the millions of Masked Minions still can't figure it out! It's like the tens of thousands of people who "tested positive" with the bogus PCR test and were ordered to "self-isolate" (so they wouldn't "infect" others) for the designated period...none of those people were sick!!! It actually surprises me that very few people even noticed that little fact. Money - Power - Control! That formula seems to have been very successful for the oligarchs.

Well, into our pork supply, and they plan to also include beef soon. Of course, we already know to avoid GMOs, so now we have to also probably become vegetarians unless we can raise our own meat or know someone who does that we can trust.

The CDC and FDA will eventually have to be shut down, especially now that they are proven to have been lying to the public about the potentially deadly graphene which is in the mRNA injection products. This fact has now been revealed in the latest court ordered Pfizer documents dump which the FDA has asked to court to not reveal to the public for the next 75 years:

***FDA confirms Graphene Oxide is in the mRNA COVID-19 Vaccines***
thelibertybeacon. com/fda-confirms-graphene-oxide-is-in-the-mrna-covid-19-vaccines/
(remove the space from the above link for it to work properly)

Great links there; thank you! Graphene Oxide is used in semiconductor technology...not hard to figure out, for any thinking person. It all ties in with the Transhumanism agenda of the WEF.

14 days ago
Perhaps this is why Moderna calls its "vax" an "operating system." When these shots first came out, I read that Moderna was calling its jab an "operating system" so I checked their website. Sure enough – there is was – an "operating system" just like a computer "program." Beware of anyone who tries to "program" you.
5 0 Reply • Share ›

**Ricky Ricardo** → Clare Goldsberry
13 days ago
Don't worry about me. I have an impenetrable firewall - nobody gets in! "Originally named ModeRNA, Moderna is a cesspool of transhuman thought: "We are actually hacking the software of life. We think about it as an operating system. So if you could actually change that, if you could introduce a line of code, or change a line of code, it turns out it has profound implications for everything." (Tal Zaks, former CMO) - TN Editor" -

I cannot begin to imagine living in my body with the neurological symptoms that this young man is experiencing. But not only that he has to do battle with the medics who deny any physical cause of his problems and try to convince him it is in his mind. It is the same story repeated endlessly of complex injuries following covid injections and then rejection and gaslighting by the same group of people who are part of administering this poison. I hope Dr Kory is able to help Andre regain his health.
29 0 Reply • Share ›

**Linda N** → annemat
15 days ago
I firmly believe that most these doctors who deny any physical cause of the problems of the jab injured, know in their heart that these people are in fact jab injured. They just won't make that diagnose because they know they will lose their jobs. The gaslighting is intentional and they do not care. Maybe some are so deluded that they really believe that the jab injured are crazy or neurotic, but most. IMHO, know and deliberately gaslight the patient anyway. Evil evil stuff we are dealing with here!

Have you watched *VAXXED II*? If not, you definitely should take the time to watch it. Just search for *VAXXED II* on rumble and you will find many. It's 1 hour and 38 minutes in duration and worth every minute of your time.

Polly Tommey, the producer, has a son, Billy, who was permanently injured by the MMR vaccine and will require care for the rest of his life. Billy's vaccine injury story is prominently featured in the earlier documentary *Vaxxed: From Cover-Up to Catastrophe*. *VAXXED II* interviews vaccine injured children and parents of vaccine injured and/or deceased children as the *VAXXED II* RV bus travels across the U.S. It's a simply stunning documentary

"COVID vaccines raise mortality rate by 26%, analyst reveals at Sen. Ron Johnson's roundtable"
Those 'under the age of 50 who took the vaccine now have a 49% higher mortality rate,' and individuals who received just one dose of the shots, 'have an approximately 145% worse mortality rate,' said analyst Josh Stirling. 'That ends up being something like "600,000 excess deaths per year" in the United States.'

Ron Johnson is one person. He is trying to raise awareness in a legislative body that would rather just not hear the truth about the vaccines. How many Democrats have spoken out against it and shared the stories of vaccine injured people? I am from Georgia and recently communicated with my Senate representatives, both Democrats, about vaccine mandates.The response I received from Raphael Warnock was the standard, party line that the vaccine is 'Safe and Effective'. I wrote back asking him why he had not been present at the panels Ron Johnson had held to see the testimony of the vaccine injured and told him that Pfizer had admitted the vaccine had not even been tested for prevention of either transmission or contraction of the virus before it was released. No response from Senator Warnock. I heard back from Senator Jon Ossoff too..saying they were 'studying the issue'. Why don't you write to your representatives with your concerns about this? They will start to listen if their constituency speaks up. It is going to take more than one person in the Senate to make changes.

A tragic story. Poor guy. There must be tons of cases out there that are like his. That the doctors refuse to admit responsibility, liability, or be held accountable is absolutely shameful. And this speaks volumes about the medical profession as well as the college/university system. To say that his condition was brought on by anxiety and stress is absolute BS.

Demon$$$ of Death, Deceit & Devastation to humanity !! One of my friends, college sons roommate June 2021 came home after the first Moderna shot and had a full on heart attack!!! . He survived and ended up with heart surgery in the hospital when he suffered another heart attack.... He did not make his University of Chicago graduation!! Since then, I personally know of EIGHT people who had full heart attacks days/weeks of Jab and/booster = FOUR DIED ... Youngest an Anaheim man 19 years old…oldest is my friend's best friend age 57.!!!

Yes....my nephew dropped dead ....found in his apt a week later. Heart attack right after taking the clot shot. Sister, for whatever reason TOOK the damn shot. Now all these heart problems, surgeries and extremely expensive trips to the hospital. Baffled as to "what" could've csused all the SUDDEN heart problems. Unbeelievable! I'm still baffled at how many people were coerced into it.ILike, what happened to "critical thinking" & common sense. Screw a job. I want to live!!! And I don't even want to work for any company that would require me to be a human guinea pig as the billionaires rack up $$ at the expense of my health...

That's horrible. I'm baffled as well. 6 faculty members at my University suddenly passed away just since last Sep. And 3 international students in their off campus residence. 4 international students in a car accident as well but I don't think that was vaccine related but really don't know, it was a head- on collision. My university is very small & private, roughly 7,500 students & 240 faculty.
I have been going there for almost 5 years (I'm Graduate student now) and before this year I had never received an email from them saying there will be a memorial for the faculty lost in the last year. Because this definitely has not happened before... so many professors in one 10month period.
My brother's goes to a different university and his physics professors (early 50s) was found dead in his house by his partner, this was right before spring break (week of Mar.13). No news yet on cause of death but he told me that he seemed like a healthy man. It's just all very strange.

Very tragic for this young man; and equally as tragic is the lack of compassion and care he received from the slew of so-called expert "doctors". I am glad he is now under the care of Dr. Kory, who has an excellent reputation for the vaccine-injured. I wish him prayers and the strength to heal.
I hope KARMA comes to those who are cowards and still serve the evil and their narrative.

The Globalist elites in Washington, WHO, WEF, U.N.,Davos members all agree over population is their biggest concern. They and Bill Gates have set into motion steps to reduce populations worldwide. First the bioweapon, COVID and secondly the tainted vaccine. This is why corrupt governments continue to push the vaccine. These people are psychopaths dedicated to our destruction. Fewer people are easier to control than many.

**Giselle L**
15 days ago

It was an awful choice this young man was pressured to make...no jab, no degree. I know in hindsight he wishes he had waited it out because unfortunately, he didn't get the degree and lost his health in the process. That's a cost many students don't foresee when they cave to these university mandates. I respect him for sharing his story and truly hope that his health will eventually be restored.

A question for the Defender: Why doesn't this article name the college or university which mandated this young man's vaccine? I re-read the article thinking I missed it but am not finding it. That's a huge omission for an article of this nature.
